LIGHTNING FAST INTERNET SPEED ON YOUR MOBILE AND PC

2Mb,1Mb,512kbps,256kbps and 128 kbps

ACCESS POINT NAMES AND USEAGE

- 1) **BSNLNET** : To browse internet at faster rate.
- 2) **BSNL MMS**:To send and receive MMS/VIDEO CLIP
(Multi Media Messaging)
- 3) **BSNL STREAM** : To watch LIVE TV Channels/
Programs on Mobile.(with handsets having real player)
- 4) **BSNL LIVE** : To download the contents.i.e.
MOVIES,WALL PAPERS,MOBILE GAMES,
AUDIO & VIDEO SONGS ,VIDEO CLIPS etc.

MOBILE HANDSET SETTINGS **FOR 3G,GPRS/MMS**

Go to internet site: [**http://www.cellone.in**](http://www.cellone.in)

(Any body can send the setting having internet access.Just 6 clicks.)

This method works for almost all mobile handsets of all mfg. companies specially **NOKIA,SONY ERICSSON,SAMSUNG,LG** etc.handsets.

This method does not work for the Palmtops/Smart Phones/Pocket PC i.e.windows base handsets.Mobiles of the companies '**DOPOD,O2,HP,i-mate,Treo,HP iPAQ,HTC touch-flow,APPLE I-PHONE** etc. (In these types of handsets,setting is very simple.)You have to manually write only Access point name(APN) as **bsnlnet** and select modem as **CELLULAR LINE(GPRS)**. Click on **Next** and then click on **Finish**. Detail procedure give in the slides.

Click on GPRS/MMS Settings(Red arrow).

The screenshot shows the BSNL website interface. At the top left is the BSNL logo and the text "Bharat Sanchar Nigam Limited". To the right, it says "CELLULAR MOBILE SERVICES". Below this is a blue banner with "Value Added Services". A navigation bar contains links for "Home", "Corporate", "Postpaid", "Prepaid", "Tariff", "Help Desk", and "FAQ". A green banner below the navigation bar states "BSNL is introducing new Location Based Services".

On the left side, there are three menu items: "GPRS Portal", "My Service Portal", and "Location Based Services". Below these are two service links: "BSNL Mobile - Postpaid Duplicate Bill" and "Pay CellOne Bill". At the bottom left, there is a "BSNL TUNES" section with a link for "North Zone Subscribers" to "CLICK HERE to Browse and Select Songs/Musics as BSNL TUNE".

The main content area features an "Introduction" section. A red arrow points from the "Introduction" heading to a yellow box containing the text "Click here to download GPRS/MMS Settings". The introduction text describes BSNL Mobile as India's fastest growing service, bringing cellular telephony to the masses through innovative technology and strategic pricing. It mentions that the service uses state-of-the-art GSM technology to attain global excellence and leadership in business, and that it provides GSM cellular service at an affordable cost to the common man. Two links are provided: "International roaming coverage across the world details >>" and "Check your city for BSNL Mobile coverage details >>".

At the bottom of the page, there is a copyright notice: "Copyright©2006, Bharat Sanchar Nigam Ltd. All rights reserved. For suggestions or any difficulties on this site please contact [webmaster](#)".

Select states to which subscriber belongs under West Zone(Red arrow).

Go to GPRS Portal to **Download** your fa

MY SERVICE PORTAL

Phone Number: 919422012345

WIB Services **Device Management**

Welcome!

You are now logged in to My Service Portal. You find the services available to you by selecting the different tabs in the menu.

Select the mobile manufacturing company which subscriber is using from the drop down list of Phone Vendor (Red arrow). Then select Phone Model from drop down list (Green arrow). (EX.Subscriber using Nokia 6630) Go to next slide.

The screenshot shows a Microsoft Internet Explorer browser window displaying the 'MY SERVICE PORTAL' website. The browser's address bar shows the URL: <http://210.212.179.163/insp/tpm/html/index.jsp>. The website header includes the logo for 'MY SERVICE PORTAL' and a phone number: 'Phone Number: 919422012345'. Below the header, there are two tabs: 'WID Services' and 'Device Management'. The 'Device Management' tab is active, and the page title is 'Device Management'. The main content area contains the following text: 'Select your phone model and then configure your phone with device settings. The settings will be sent to your mobile phone via SMS.' Below this text, there is a link: 'Don't know which phone vendor or model you have? Click here to help identify your phone!'. At the bottom of the page, there are two dropdown menus: 'Phone Vendor' and 'Phone Model'. The 'Phone Vendor' dropdown menu is currently set to '-- Select Phone Vendor --' and has a red arrow pointing to it. The 'Phone Model' dropdown menu is currently set to '-- Select Phone Model --' and has a green arrow pointing to it.

Pl select the handset make of your mobile from drop down list.

WIB Services Device Management

Device Management

Select your phone model and then configure your phone with device settings. The settings will be sent to your phone via SMS.

Don't know which phone vendor or model you have?
[Click here to help identify your phone!](#)

Phone Vendor: Nokia

Phone Model: Magnatec, Magneti Marelli, Maxon, Maxx, Medion, Microlise, Micromax, Microsoft, Mio, Mirae, Mitsubishi, Motorola, Movistar, NEC, NKTEL, NTT DoCoMo, Neonode, NetworkCar, Nintaus, Nokia

© 2003 SmartTrust AB

Pl select the exact handset model.

The screenshot shows a web browser window with the following details:

- Browser Title:** My Service Portal P.3.3.1.A - Mozilla Firefox
- Address Bar:** http://210.212.179.183/msp/tpn/html/selectConfiguration.jsp
- Page Header:** MY SERVICE PORTAL, Phone Number: 919420012345, Help | Logout
- Navigation:** WMB Services | Device Management
- Section:** Device Management
- Text:** Select your phone model and then configure your phone with device settings. The settings will be sent to your phone via SMS.
- Link:** Don't know which phone vendor or model you have? Click here to help identify your phone!
- Form:** Phone Vendor: Nokia; Phone Model: 6630 (with a dropdown menu open showing various models like 6500 classic, 6500 slide, 6510, 6555, 6555b, 6590, 6590i, 6600, 6600 fold, 6600 slide, 6600i slide, 6610, 6610i, 6620, 6630, 6650, 6650 classic, 6651, 6670, 6670b).
- Annotation:** A red arrow points to the '6630' option in the Phone Model dropdown.
- Footer:** © 2003 SmartTrust AB

(Now you can click on Configure My Phone four settings will be received by sub. but it is advisable to send settings **one by one** to avoid confusion of subscriber in making Default profile.) Click on Customise configurations. Click on checkbox of BSNL LIVE, BSNL STREAM, BSNL MMS to unmark so that sub will get only BSNLNET (Next slide).

The screenshot shows a web browser window with the address bar displaying `http://210.212.179.183/msp/tpm/html/selectConfiguration.jsp`. The browser's address bar includes navigation buttons (back, forward, refresh, home) and a search bar with the Google logo. The browser's tab bar shows two tabs: "My Service Portal P.3.3.1.A" and "My Service Portal P.3.3.1.A".

The web page content includes:

- Header: "MY SERVICE PORTAL" with a logo on the left and "Help | Logout" on the right. Below the header, the phone number "919420012345" is displayed.
- Navigation: Two tabs are visible: "WIB Services" and "Device Management".
- Section Header: "Device Management" in green text.
- Text: "Select your phone model and then configure your phone with device settings. The settings will be sent to your phone via SMS."
- Text: "Don't know which phone vendor or model you have? Click here to help identify your phone!"
- Form: Two dropdown menus for "Phone Vendor" (selected: Nokia) and "Phone Model" (selected: 6630).
- Settings Table:

Configure My Phone

© 2003 SmartTrust AB

(You can check the status whether sub got the Config.Message)
Click on Check your request status(Red arrow).Please see **The transaction is completed** meaning sub.got the config.message.

The image shows a screenshot of a web portal interface. On the left, the 'MY SERVICE PORTAL' header includes a 'SmartTSP' logo and a phone number '91942'. Below the header, there are tabs for 'WIB Services' and 'Device Management'. The main content area displays a 'Download Confirmation' message: 'Your configuration is now being sent to your Nokia 6630. Check your request status'. A green 'Back' button is visible, with a red arrow pointing to it. On the right, a separate window titled 'Request Status' is open, showing a table with the following data:

Transaction ID	Status
69991279239124	The transaction is completed

Below the table is a green 'Continue...' button. The browser's address bar shows the URL 'http://210.212.179.183/msp/tpm/html/checkRequestStatus.jsp'. The Windows taskbar at the bottom shows 'Done' and 'Internet' icons.

Subscriber will receive one configuration message. In most of the handsets while opening configuration message handsets ask to enter configuration pin.

Configuration PIN Code is always :1111 (Password protected message. Always same for all types of handsets.)

Please enter the pin code 1111 and press **OK**

The message will be open press options to

Open it, press options for **SAVE/INSTALL/UPDATE**
press **YES/OK**.

THE SUBSCRIBE CAN SET ONLY ONE DEFAULT PROFILE AT A TIME IN HIS/HER HANDSET. HE/SHE CAN BROWSE ONLY VIA DEFAULT PROFILE.

FOR NOKIA HANDSETS

(In most of handsets):After saving the message handset will ask

“**Set as DEFAULT SETTINGS?**” Press **YES**

(Press the button on which marked by **RED** to return normal screen)

Here finish the settings part.

TO BROWSE INTERNET...

“**PRESS AND HOLD ZERO BUTTON KEY**”(key on which zero number is printed.This shortcut is available in NOKIA ONLY)

On the screen appears “**connecting via BSNLNET**” or connecting via

“**bsnlnet**” This is cross test to verify that subscriber had done correct Default setting.

OPENS THE FANTASTICK WORLD OF FAST INTERNET ON MOBILE DIVICE.

If handset does not ask to set as Default(very few handsets).

Then Go to next slide.

SAVE MESSAGE

Go to **WEB/SERVICES** menu → **OPTIONS** → **SETTINGS** → **ACTIVE ACCESS POINT/DEFAULT ACCESS POINT** → Select → **bsnlnet** → **ACTIVATE/ SELECT** and return to normal screen then **PRESS AND HOLD ZERO BUTTON KEY**.

ALWAYS USE GPRS SETTINGS EXCLUSIVLY FOR BROWSING THE INTERNET ON MOBILES HAVING BROWSER WAP 2.0 HANDSETS.IT'S FASTER THAN WAP.

WAP SETTINGS IS FOR BROWSING INTERNET AND DOWNLOAD THE CONTENTS i.e. WALLPAPERS,GAMES,PICTURES ETC.

Repeat the above procedure and send BSNL LIVE settings to download WAP contents. Ask subscriber to save but **NOT DEFAULT.When subscriber wants to download the content he/she should make the BSNL LIVE setting as Default.He/She can change as per the need.**

TO CHANGE DEFAULT SETTINGS:Main

MENU → **WEB** → **OPTIONS** → **SETTINGS** → Select **DEFAULT ACCESS POINT** → **OPTIONS** → **SELECT CHANGE** → **bsnllive**

Come to normal screen press and hold zero button key and browse and/or download what he/she wants.

WAP SETTING FOR THE HANDSETS HAVING WAP BROWSER 1.2.1 OLD VERSION HANDSETS e.g.NOKIA 6510,2626,2650,2652,Motorola V3i,L6,L6i,L7,L7i etc.

(For these types of handsets gprs settings will not work but sub can browse internet sites connecting to PC/Laptop. Please refer our PC connectivity slide shows.

Send the wap settings save the MESSAGE → GO TO WEB/INTERNET SERVICES → OPTIONS → SETTINGS → ACTIVE ACCESS POINT → OPTIONS → SELECT → *bsnllive*

Browsing procedure is same as stated earlier. With these types of handsets sub can browse only wap sites which are very few in numbers.

**Ex. wap.cellone.in ,wap.bsewebx.co.in ,
wap.kalnirnay.com ,wap.hungama.com**

Repeat the above procedure for MMS. Send the MMS setting and activate as default.

For MMS: Go to MESSAGE → OPTION → SETTINGS → MULTIMEDIA MESSAGE → SELECT ACCESS POINT IN USE → *bsnlmms*

Return to normal screen and send MMS to self for testing.

FOR SONY ERICSSON HANDSETS

New settings received Install?

Press **Yes**

Press **MENU** → **SETTINGS** → **CONNECTIVITY** → **INTERNET**

SETTINGS → **INTERNET PROFILES** → SELECT **bsnlnet**

as default (Default will be marked as black spot inside the halo white circle like this )

Again select **Internet profiles** take cursor on **bsnlnet**

and press **More** → **Select Settings** → (it will show)

Connect using: bsnlnet

Internet mode: HTTP

Use proxy: NO (If it is **YES** for gprs make it **NO MANUALLY**. This has to be done **only for GPRS** for Sony Ericsson. For wap and mms no need to change anything). Come back to normal screen.

TO BROWSE INTERNET on mobile press **Menu** → select **Internet Services** → (most of the People tries to browse here.) Press **More** → **Go to: bsnlnet** (select to go to home page or go to Enter address **FOR THE SITE YOU WANT TO BROWSE** you can make bookmark for frequently Useful sites you visit).

OPENS THE FANTASTICK WORLD OF INTERNET ON MOBILE DIVICE.

FOR WAP: Send the message and select it as default and repeat the above procedure to browse/download contents.

MMS: MENU → SELECT MESSAGING → SELECT SETTINGS → PICTURE MESSAGE → MESSAGE SERVER: <http://mms/mmssc> INTERNET PROFILE: SELECT **bsnlmms**

MOTOROLA V3i, V3, L6, L6i, L7, L7i & ROKR, A1200 etc.

Please repeat the procedure given above for sending the message from the site www.cellone.in

Phone will receive message. The phone will ask “New setting received, Install?” press Yes then go to web access then web session and make the bsnlive as default for Motorola, specially for **V3, V3i, L6, L6i, L7, L7i** (wap handsets only).

For **L6i & L7i** Please send the setting of **L6 & L7** from the site. The default profile will be marked as .Com
e to normal screen there is shortcut/wap key Available on the phone it self press it.

For **ROKR, A1200**, **bsnlnet** will be received set it default and browse any internet site on the handsets.

GPRS SETTINGS ON SMS

(type SMS send to 19000 configurations messages will RECEIVED, save it start browsing)

Take the handset and type message

“Handset make i.e.(company name) space model no” and send the message to “58355” For example “Nokia 6600”----->58355

Nokia n72 type message “Nokia n72”

For Sony Erricsson k750i type message “Sonyerricson k750i”

For lg3200 type message “Lg 3200”

Wait for some time and you will receive four Configuration message from 58355 .If it opens directly no problem, but if the handset ask PIN CODE then it is always “1111” named

- 1)“bsnlnet”
- 2) “bsnllive”
- 3) “bsnlstream”
- 4) “bsnlmms”

After receipt of the messages the procedure is SAME as described in slide No.11,12 and 13 for the respective mobile mfg.*There is chance of mistake in sending SMS so first method of www.cellone.in is perfect one compare to sending message.*

DOPOD,O2,HP,HTC I-MATE,SAMSUNG SGH-i710,X CINGULAR etc.I.e WINDOWS BASE MOBILES

Go to **Start** → **Settings** → **Connections** → **Connection** → (Under internet settings select) **Add a new modem connection** →

Enter a name for the connection: **BSNL** (you can type any name as you like)

A modem (from the drop down list select): **Cellular Line (GPRS)**

(On the bottom of your screen select): **Next**

Access Point Name (APN): **bsnlnet**

Press : **Next**

User name: Leave it blank

Password: Leave it blank

Domain: Leave it blank

In the bottom line press: **Finish**

(Make the connection **BSNL** default indicated by this sign )

Here setting is finished.

TO BROWSE INTERNET

Method 1)

**Press Start → internet explorer → enter url/site name which you want to browse.
OPENS THE FANTASTICK WORLD OF INTERNET ON MOBILE DIVICE.**

Method 2)

Under internet settings click on Manage existing connection. On your screen **BSNL** (the name you had given will be shown)

with the **Joystick/Stylus** (the stick coming along with the handsets).

Tap and hold on the name i.e. BSNL, two sub menu will be displayed i.e. Delete and Connect, click on connect.

Please Observe the symbol of “E” or G. In HTC a small E comes out of E.

In O2 the symbol ‘G’ in the top center of your screen. The two arrows start coming out of ‘G’ in

the opposite direction. As soon as it got connected the moving arrows will get stable.

Now you can browse any internet site. In some companies, when it got connected a symbol of small G coming out of symbol of big G.

**Press Start → internet explorer → enter url/site name which you want to browse.
OPENS THE FANTASTICK WORLD OF INTERNET ON MOBILE DIVICE**

Note: Always keep only one connection setting i.e. BSNL and use method 1 as it is simple. if you have only one connection directly start browsing by method 1 as and when you want to browse the internet.

PROBLEM & SOLUTIONS IN O₂,HP,WHILE CONNECTING

Go to **Settings** → **Connection** → **Connection** → **Under internet settings** select **Manage existing connection**.

The connection name you had made will be shown i.e. **BSNL** (as in this example.)

Select the connection and **click on Edit**

(Please delete another existing connections if any. It is advisable to have only one connection that you have made. When only one connection is there phone will always get connected via that connection. When you want to browse the internet just click on icon of internet explorer and open any internet site, the phone will have to connect with only one connection that you have kept.)

Check for the following parameter

Connection name : **BSNL**

A modem(from the drop down list select): **Cellular Line (GPRS)**

(On the bottom of your screen select): **Next**

Access Point Name(APN): **bsnlnet** (please check the APN.

Press Next

User name: Leave it blank

Password: Leave it blank

Domain: Leave it blank

Click on Advanced

(A black spot() inside the circle to show selected.)

Two sub menu **TCP/IP** and **SERVERS** will be shown.

First click on TCP/IP select and see ()USE SERVER-ASSIGNED IP ADDRESS

Then click on SERVERS and see/select USE SERVER –ASSIGNED ADDRESSES SELECT USE SERVER –ASSIGNED IP ADDRESS

CLICK ON OK at the upper right hand top corner of the screen.And click on FINISH at the bottom left hand corner.

TRY TO OPEN THE INTERNET SITE.

If still problem persist the mobile has to give half reset or full reset specially in O2,HP. But due care has to be taken because in giving reset subscriber may lost the data partly or fully so unless until sub gives his/her consent to reset **do not give reset to the handset.**

It is advisable to take back-up of the handset and then give half reset first and try to browse. Most (90%) problems get resolve with the half reset and For the remaining problem full reset should be given.

Subscriber should be made aware of the fact of data loss and half/full reset should be given by the subscriber.

(Reset has to be done to get setting effective which you have made)

METHODS OF *HALF RESET* or *FULL RESET*

Half reset: Insert the stylus in the small aperture at the bottom of handset and push it gently the phone will be reseted and try to browse Internet site.

Full reset: The above method of half reset and switch off button should be press together (at the same time) and phone will get reseted Completely. Try to browse the internet.

i-mate sp-3/HTC S710

Go to **START** → **SETTINGS** → (PRESS CENTR BUTTON) → **MORE** → **DATA CONNECTION** → (right button press) → **MENU** → select **Edit connection** → 4 GPRS Connection Press Right hand bottom Corner button → **Menu** → 1ADD(SELECT):
